## Countries<sup>1</sup> with risk of yellow fever transmission<sup>2</sup> and countries requiring yellow fever vaccination

Country	Country with risk of yellow fever transmission	Country requiring yellow fever vaccination for travellers <sup>3</sup>		Country statement on period of validity for yellow fever vaccination certificate <sup>3</sup>
		arriving from countries with risk of yellow fever transmission (age of traveller)	from all countries (age of traveller)	
Albania		Yes (> 1 year)		Not communicated
Algeria		Yes <sup>4</sup> (> 1 year)		Life
Angola	Yes		Yes (> 9 months)	Life
Antigua and Barbuda		Yes (> 1 year)		Not communicated
Argentina	Yes			Not applicable
Australia		Yes <sup>4</sup> (> 1 year)		10 years
Bahamas		Yes <sup>4</sup> (> 1 year)		Life
Bahrain		$Yes^4 (> 9 months)$		Life
Bangladesh		Yes (> 1 year)		Not communicated
Barbados		$\operatorname{Yes}^4$ (> 1 year)		Not communicated
Belize		$Yes^5$ (> 1 year)		Life
Benin	Yes	$Yes^5$ (> 1 year)		Life
Bhutan		Yes <sup>5</sup>		Not communicated
Bolivia, Plurinational (State of)	Yes	$Yes^4$ (> 1 year)		Life
Botswana		$Yes^5$ (> 1 year)		10 years
Bonaire, Saba, Sint Eustasius		Yes (> 6 months)		Not communicated
Brazil	Yes			Not applicable
Brunei Darussalam		Yes <sup>4</sup> (> 1 year)		Life
Burkina Faso	Yes	$Yes^5 (> 9 months)$		10 years
Burundi	Yes		Yes (> 1 year)	Life
Cabo Verde		$Yes^4$ (> 1 year)		Not communicated
Cambodia		Yes <sup>4</sup> (>1 year)		Not communicated
Cameroon	Yes		Yes (>9 months)	Life
Central African Republic	Yes		Yes (> 9 months)	Not communicated

<sup>1</sup> For the purpose of this publication, the terms "country" and "countries" cover countries, territories and areas.

<sup>2</sup> Risk of yellow fever transmission is defined as yellow fever being currently reported or having been reported in the past and presence of vectors and animal reservoirs representing a potential risk of infection and transmission.

<sup>3</sup> Country requirements are subject to change at any time. It is important that travellers ensure that they know the requirements of the country to which they are travelling by checking with the relevant consulate or embassy.

Period of validity: Until 10 July 2016, the IHR (2005) continue to provide that the period of validity of these certificates of vaccination against yellow fever is **ten years** from the date that the vaccination is effective; see IHR (2005), Annex 7. However, in accordance with the amendment to the IHR (2005) adopted by the World Health Assembly resolution WHA67.13, **beginning 11 July 2016 the period of validity of all such certificates of vaccination against yellow fever will change from 10 years to the duration of the life of the person vaccinated, including for certificates already issued and new certificates. Accordingly, as of 11 July 2016, valid certificates of vaccination presented by arriving travellers cannot be rejected on the ground that more than ten years have passed since the date vaccination became effective as stated on the certificate; boosters or revaccination cannot be required.** 

As stated in the fourth column of the table above, some countries have already started accepting these certificates as valid for the life of the person vaccinated.

<sup>4</sup> Includes yellow fever vaccination requirement for traveller having transited more than 12 hours through the airport of a country with risk of yellow fever transmission.

<sup>5</sup> Includes yellow fever vaccination requirement for traveller having transited through the airport of a country with risk of yellow fever transmission.
